- 1) Your class had a pizza party.  $\frac{3}{8}$  of one pizza was left over, and  $\frac{4}{8}$  of another pizza was left over. You put them both into one box. How much pizza do you have altogether?
- 2) A cake recipe requires  $\frac{3}{5}$  cup of sugar for frosting and  $\frac{1}{5}$  cup of sugar for the cake. How much sugar is there altogether?
- 3) You walk  $\frac{3}{10}$  of a mile to your friends house, and then  $\frac{5}{10}$  of a mile to school. How far did you walk altogether?
- 4) Sara and Lissy shared  $\frac{2}{3}$  of chocolate ice cream and  $\frac{1}{5}$  of butterscotch ice cream. How much ice cream did they share in total?
