Use bar notation if necessary.</p> <p>A. $\frac{1}{3}$</p> <p>B. $\frac{4}{5}$</p>
<p>7.NS.3</p> <p>Isiah had debt of \$480 on his credit card and then paid back \$200. What is the status of his credit card now?</p>	<p>7.NS.3</p> <p>Calvin starts a business, and has to take out a loan of \$5,000. He makes a profit of \$800 during the first month and then for the next two months records a profit of \$-100 and the fourth month made a profit of \$3,000. What is the total profit for the first four months of Calvin's business?</p>

7th Grade Mathematics
Number System

How well do you understand the most about the number system?

How much do you like to understand better about the number system?

(MINIMUM EFFORT) you gave and put a BOX (10: YOU COULD SEE) around how you would rate your understanding of the standards below.

4 5 6 7 8 9 10

Standards you got correct and leave the ones you missed. If you got one correct and missed one color it halfway in.

7.NS.2 7.NS.3

2 QUESTIONS PER STANDARD

By: Math in the Midwest

7th Grade Mathematics

Number System

7.NS.1

Solve the following integer problems;

1. $-5 + 4 =$ _____

2. $7 + (-11) =$ _____

3. $2 - 10 =$ _____

4. $-4 + (-12) =$ _____

5. $-8 - (-10) =$ _____

7.NS.2

Determine each product or quotient:

1. $-2 \times -2 \times -2 =$ _____

2. $-12 \div 2 =$ _____

3. $-4 \times -3 \times 2 =$ _____

4. $-1 \times -1 \times -1 \times -1 =$ _____

5. $-20 \div -4 =$ _____

7.NS.3

Isaiah had debt of \$440 on his credit card and then paid back \$200. What is the balance of his credit card now?

7.NS.1

Write an integer addition problem that would represent an elevator that starts at street level (main lobby), goes up 9 floors and then back down 12 floors to the parking garage.

7.NS.2

Convert the following fraction to a decimal and then classify if the decimal is terminating, non-terminating, repeating or non-repeating. Use bar notation if necessary.

A. $\frac{1}{3}$

B. $\frac{4}{5}$

7.NS.3

Calvin starts a new computer business. He makes a profit of \$800 during the first month, and then for the next two months records a loss of \$100 and the fourth month made a profit of \$3,000. What is the total profit for the first four months of Calvin's business?

Name: _____ Date: _____ Hour: _____

7th Grade Mathematics

Number System

REFLECTION

A. What do you feel like you understand the most about the number system?

B. What is one area you would like to understand better about the number system?

C. **CIRCLE the effort** (10: MAXIMUM EFFORT) you gave and put a **BOX** (10: YOU COULD TEACH THIS TO SOMEONE ELSE) around how you would rate your **UNDERSTANDING** of the content using the number line below.

7th Grade Mathematics

Number System

7.NS.1

Solve the following integer problems;

1. $-5 + 4 = \underline{-1}$

2. $7 + (-11) = \underline{-4}$

3. $2 - 10 = \underline{-8}$

4. $-4 + (-12) = \underline{-16}$

5. $-8 - (-10) = \underline{2}$

7.NS.2

Determine each product or quotient:

1. $-2 \times -2 \times -2 = \underline{-8}$

2. $-12 \div 2 = \underline{-6}$

3. $-4 \times -3 \times 2 = \underline{24}$

4. $-1 \times -1 \times -1 \times -1 = \underline{1}$

5. $-20 \div -4 = \underline{5}$

7.NS.3

Isaiah had debt of \$440 on his credit card and then paid back \$200. What is the balance of his credit card now?

$$-440 + 200 = \$ - 240$$

7.NS.1

Write an integer addition problem that would represent an elevator that starts at street level (main lobby), goes up 9 floors and then back down 12 floors to the parking garage.

$$0 + 9 - 12 = -3$$

7.NS.2

Convert the following fraction to a decimal and then classify if the decimal is terminating, non-terminating, repeating or non-repeating. Use bar notation if necessary.

A. $\frac{1}{3}$

$$0.3333 \dots$$

non – terminating and repeating

B. $\frac{4}{5}$

$$0.8$$

Terminating and non – repeating

7.NS.3

Calvin starts a new computer business. He makes a profit of \$800 during the first month, then for the next two months records a loss of \$100 and the fourth month made a profit of \$3,000. What is the total profit for the first four months of Calvin's business?

$$800 + (-100) + (-100) + 3,000$$

The business's profitability was \$3,600
