

Division

Name: _____

Lissie has a lot of art materials. She needs to organise all these materials into containers.

1) She counted her crayons and found out that she has 72 crayons which she will place in crayon boxes. Every crayon box can contain 8 crayons. How many crayon boxes does she need?

2) 3 piles of clean white papers were stacked in the corner of her room. She decided to place these papers in envelopes which can hold 10 papers each. How many envelopes does she need if she has 150 clean papers?

3) Besides the piles of paper was a stack of 850 sheets of used paper. She wants to place it in boxes for recycling. If every box can contain 170 sheets, how many boxes does she need?

4) Lessie's younger brother helped pick up all the paper clips in Lessie's room. He was able to collect 63 paper clips. If he wants to distribute the paper clips in 7 boxes, write an equation showing how many paper clips each box will contain.
