Task Cards 7.SP.4

20 Task Cards, Recording Sheet, Answer Sheet

7.SP.4

Use measures of center and measures of variability for numerical data from random samples to draw informal comparative inferences about two populations.

5

A restaurant wanted to figure out which day to have more employees working so they surveyed how many customers they had on the weekends for one month. According to the data which day should they have more employees working?
Friday: 234, 186, 245, 309
Saturday: 375, 112, 280, 200
Sunday: 190, 235, 375, 160

7.SP.4

7

Movie Machine and Cinema 5 each say they have more customers than the other. They gathered data for one week:
Movie Machine: 200, 147, 345, 194, 280, 465, 540

Which measure of center would you use if you owned the Movie Machine?

7.SP.4

6

Movie Machine and Cinema 5 each say they have more customers than the other. They gathered data for one week:
Movie Machine: 200, 147, 345, 194, 280, 465, 540
Cinema 5: 380, 175, 245, 400, 330, 310, 495

Which movie theatre has on average more customers come to their theatre?

7.SP.4

8

Movie Machine and Cinema 5 each say they have more customers than the other. They gathered data for one week:
Cinema 5: 380, 175, 245, 400, 330, 310, 495

Which measure of center would you use if you owned Cinema 5?

7.SP.4

13

The number of runs scored by a softball team over the weekend are listed below. Find the mean of these scores:

4, 7, 3, 2, 0, 4, 8, 12

14

The number of runs scored by a softball team over the weekend are listed below. Find the median of these scores:

4, 7, 3, 2, 0, 4, 8, 12

7.SP.4

Use measures of center and measures of variability for numerical data from random samples to draw informal comparative inferences about two populations.

1

True or False

Measures of center
provided a summary
about the data.

7.SP.4

2

True or False

Variability describes how
spread out a data set is.

7.SP.4

3

Find the following information
on the data set:

12, 18, 14, 16, 13, 12, 4, 6

Mean:

Median:

Mode:

7.SP.4

4

Find the following information
on the data set:

12, 18, 14, 16, 13, 12, 4, 6

A restaurant wanted to figure out which day to have more employees working so they surveyed how many customers they had on the weekends for one month.

According to the data which day should they have more employees working?

Friday: 234, 186, 245, 309

Saturday: 375, 112, 280, 200

Sunday: 190, 235, 375, 160

7.SP.4

6

Movie Machine and Cinema 5 each say they have more customers than the other. They gathered data for one week:

Movie Machine: 200, 147, 345, 194, 280, 465, 540

Cinema 5: 380, 175, 245, 400, 330, 310, 495

Which movie theatre has on average more customers come to their theatre?

7.SP.4

7

Movie Machine and Cinema 5 each say they have more customers than the other. They gathered data for one week:

Movie Machine: 200, 147, 345, 194, 280, 465, 540

Which measure of center would you use if you owned the Movie Machine?

7.SP.4

8

Movie Machine and Cinema 5 each say they have more customers than the other. They gathered data for one week:

Cinema 5:

380, 175, 245, 400, 330, 310, 495

Which measure of center would you use if you owned Cinema 5?

7.SP.4

9

Movie Machine and Cinema 5 each say they have more customers than the other. They gathered data for one week:

Movie Machine: 200, 147, 345, 194, 280, 465, 540

Cinema 5: 380, 175, 245, 400, 330, 310, 495

Which movie theatre has the highest range of customers?

7.SP.4

10

Ten words were randomly selected from a fourth grade social studies book. The following list shows the number of letters in each of the ten words:

4, 6, 5, 7, 9, 2, 1, 5, 10, 4

Ten words were randomly selected from a seventh grade social studies book. The following list shows the number of letters in each of the ten words:

5, 3, 8, 12, 8, 6, 8, 11, 7, 2

What is the mean word length for both books?

7.SP.4

11

Ten words were randomly selected from a fourth grade social studies book. The following list shows the number of letters in each of the ten words:

4, 6, 5, 7, 9, 2, 1, 5, 10, 4

Ten words were randomly selected from a seventh grade social studies book. The following list shows the number of letters in each of the ten words:

5, 3, 8, 12, 8, 6, 8, 11, 7, 2

What is the mean absolute deviation length of words in both books?

7.SP.4

12

Ten words were randomly selected from a fourth grade social studies book. The following list shows the number of letters in each of the ten words:

4, 6, 5, 7, 9, 2, 1, 5, 10, 4

Ten words were randomly selected from a seventh grade social studies book. The following list shows the number of letters in each of the ten words:

5, 3, 8, 12, 8, 6, 8, 11, 7, 2

How do the word lengths compare between the seventh-grade and the fourth-grade textbook?

7.SP.4

13

The number of runs scored by a softball team over the weekend are listed below. Find the mean of these scores:

4, 7, 3, 2, 0, 4, 8, 12

7.SP.4

14

The number of runs scored by a softball team over the weekend are listed below. Find the median of these scores:

4, 7, 3, 2, 0, 4, 8, 12

7.SP.4

15

Find the range of the following given salaries of students that graduated in the Class of 2018.

\$37,000	\$42,000
\$18,000	\$30,500
\$22,000	\$29,800
\$16,000	\$59,000
\$54,000	\$20,000

7.SP.4

16

Find the mean of the following given salaries of students that graduated in the Class of 2018.

\$37,000	\$42,000
\$18,000	\$30,500
\$22,000	\$29,800
